

VIRTUAL REALITY EXPERIENCE

IMPORTANT NOTICE: AGE RESTRICTIONS AND HEALTH WARNINGS

For health and safety reasons, the use of virtual reality terminals and headsets is strictly reserved for visitors age 13 and over. This restriction is imposed by the virtual reality technologies manufacturers. Montréal en Histoires, its partners and all designers, creators, and artists adhere to this restriction.

A number of restrictions also apply to visitors with specific conditions. Please take a moment to read the following health warning.

HEALTH WARNING

Persons subject to motion sickness also run the risk of feeling nauseous when using a VR terminal and headset. These visitors should pay particular attention to this warning.

It is recommended that **pregnant women, seniors, and individuals suffering from mental illnesses, binocular vision anomalies, heart disease, or other serious illnesses** consult a doctor before using a VR terminal and headset.

Do not use a VR terminal and headset if you have the following symptoms: strabismus, amblyopia, or anisometropia. Using a VR terminal and headset may aggravate these symptoms.

Much like the sensation felt after disembarking from a cruise ship, symptoms from exposure to virtual reality may persist or become more intense a few hours after the experience. These symptoms can include those described above as well as intense drowsiness and difficulty concentrating. These symptoms may increase the risk of injury during normal activity in the real world.
